Healthcare

The revolutionary low-code no-code
platform for healthcare

Breaking barriers, boosting results in healthcare

Exceeding patient expectations has always been the focus of the healthcare industry. But providing the utmost quality of patient care with limited resources while cutting costs is increasingly challenging. Especially with outdated legacy systems, healthcare providers struggle with inconsistent data transfer, resulting in poor service delivery.

73% of healthcare providers with legacy systems say they're expensive to maintain and a pain to keep up.

Take your **healthcare operations** to the next level

Kissflow helps modernize and digitize end-to-end healthcare operations through low-code automation

Deliver better patient care

Build customizable, scalable medical care applications that deliver improved healthcare outcomes

A holistic view of work

Track patients from admission to discharge in a single console and plan consultations and follow-ups with ease

The flexibility you need

Adopt a flexible approach to in-house and outpatient operations while resolving issues without losing agility

Trigger specific actions

Automate emails, capture and retrieve patient records, schedule appointments, and allocate resources

Effortless collaboration

Facilitate smooth collaboration and coordination among core and allied departments by adding the missing middle layer

Advanced reporting

Gain access to comprehensive dashboards that help you improve the effectiveness of hospital operations

Imagine a **single platform** for all your internal processes

Patient Management

- Patient registration
- Patient history management
- Patient appointments
- Patient mobile portal

Outpatient Management

- Appointment booking
- Prescription and follow up
- Billing interfaces
- Patient history data

Inpatient Management

- Doctor referral and case history
- Medication management
- Insurance interfaces
- Discharge management

Doctor Management

- New doctor onboarding
- Shift and time management
- Absence management
- Collaboration for consultation

Pharmacy Management

- Safety stock and re-ordering
- Inventory management
- Shelf management
- Vendor integration

Lab Management

- Patient data storage
- Report retrieval by patient
- Scheduling of appointments
- Patient history integration

Maintenance

- Maintenance request process
- Periodic maintenance process
- Activity based maintenance
- Maintenance history

HR

- Contract workforce attendance
- Training administration system
- Workforce timesheet approval
- Applicant tracking

Vibrant Emotional Health improves process health with Kissflow

Vibrant Emotional Health delivers health, emotional, and mental support care through state-of-the-art technology-enabled services.
