

Manufacturing

Radically better low-code no-code
platform for Manufacturing

Breaking the chains of manufacturing complexity

Manufacturing companies are under more pressure than ever to transform their operations. Yet, they still have to utilize multiple heavy-coded tools, such as ERP, PLM, and CRMs that require IT specialists. These systems aren't comprehensive or flexible enough to meet the demands of modern enterprises.

IT backlogs prevent 72% of teams from working on tactical projects because they're busy maintaining legacy systems.

Common challenges faced by manufacturing organizations

Modernize manufacturing operations

Manufacturing organizations automate their internal operations and accelerate digital transformation with Kissflow's low-code/no-code work platform.

-  Increase process reliability and efficiency
-  Extend the core functionality of your ERP systems
-  Reduce the limits of outdated legacy systems
-  Enable process experts to build apps independently

Bridge the gap between backend and frontend systems

Customers

Take your **manufacturing operations** to the next level

Kissflow brings the Power of Simple to streamline processes and democratize solution building.

Orchestrate master data

Connect and update data across multiple frontend and backend systems automatically

Automate follow-ups

Configure rule-based workflows to include the right person at the right time

Trigger specific actions

Automate emails, enable barcode scanners, track geo locations, build checklists, and more

Build intuitive dashboards

Gain visibility into what's in stock, in transit, or in maintenance across different locations

Transform legacy systems

Consolidate disparate systems by adding the missing middle layer through low-code automation

Unify siloed processes

Merge fragmented processes into a unified system through low-code automation

Imagine a **single platform** for all your internal processes

1

Purchasing & Inventory

- Vendor Onboarding
- Transportation Management
- Fixed Asset Purchase
- MRO & Services Purchase
- Insurance & Renewals

2

Manufacturing

- Reporting Production
- Reporting Downtime

3

Sales Order Processing

- ASN
- Export Control & Documentation
- Customer Receipt Acknowledgement
- Customer Returns & Complaints
- AR Reporting & Writeoff

4

Finance

- Credit Check
- Export & Import Documentation
- LC & Bill of Guarantee
- Budgeting

5

HR

- Employee Onboarding
- Employee Offboarding
- Leave Approval
- Performance Management
- Overtime Tracking for Contract

6

Maintenance

- Maintenance Request Process
- Maintenance History & FAQ
- Periodic Maintenance Process
- Activity Based Maintenance

The Ramco Group breaks silos with Kissflow

The Ramco Group is a conglomerate of over 40 companies operating within East Africa.

Industry
Manufacturing

Employees
4,000+

Headquarters
Kenya

Challenges

- Usage of multiple complex tools
- Lack of process uniformity
- Siloed business processes
- Poor visibility into operations
- Inability to track processes
- Delayed approval flows

Solution

Ramco uses Kissflow for running its business operations and has set up **85 processes, 400 integrations, 50 data sets**, and **5 case systems** within a year.

Results

30+ hours saved per week through automation

35% - 45% reduction in process cycle time

2500+ Processed items
