

# The All-in-One Low-Code No-Code' Work Platform

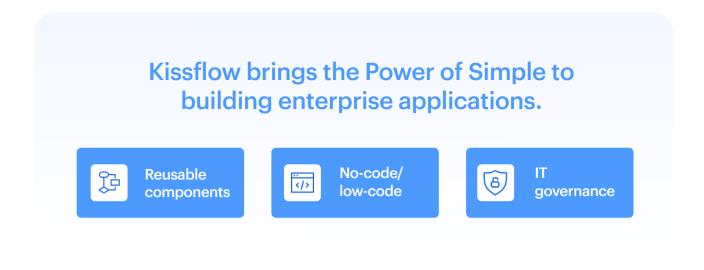

Clean up your messy middle with the Power of Simple.

# The **messy middle** of enterprise applications

As you transform your core frontend and backend systems, the mess in the middle becomes more obvious.

The middle is the chaotic tangle of internal operations handled with spreadsheets, emails, scripts, third-party tools, and shadow IT.

Yet the messy middle is where the differentiating power of digital transformation can make the most impact.

Start measuring time-to-value in weeks, not months

# What can you do with **Kissflow?**

Build custom solutions across a wide range of types of work management with Kissflow

## **App Development**

Modernize, customize, automate, and integrate enterprise-grade apps

### **Workflow Management**

Automate and deploy simple to complex workflows in minutes with a no-code builder

## **Case Management**

Handle ticketing and support requests on quick and powerful boards

## **Project Management**

Adopt a modern approach to project management with the highest visibility

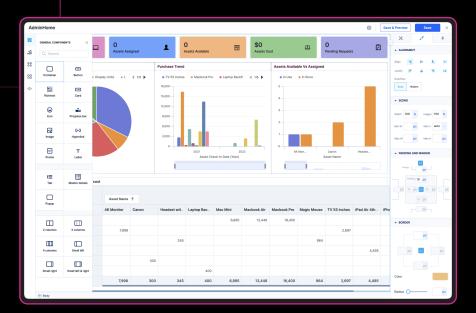

## **Process Orchestration**

Connect, coordinate, and merge RPA systems with human interactions

# Collaboration

Keep conversations about work in the same place where the work happens

# App Builder

Build fully customizable apps with dashboards, roles, pages, workflows, and more.

# **Process Builder**

Build, simulate, deploy, and run complex human-centric workflows with a no-code module

- Administration

# Who **benefits** from Kissflow?

# CIO's

1

- Move faster on digital transformation
- Save budget by shifting simpler apps away from over-priced platforms

# 2

## **Developers**

- Build applications in days with composable blocks
- Reduce time spent on simple applications

## 3

## **Functional heads**

- Get the exact functionality required without compromising
- Create unique experiences for multiple roles

## 4

## **Business analysts**

- Build applications as you go with no-code
- Make changes quickly in minutes

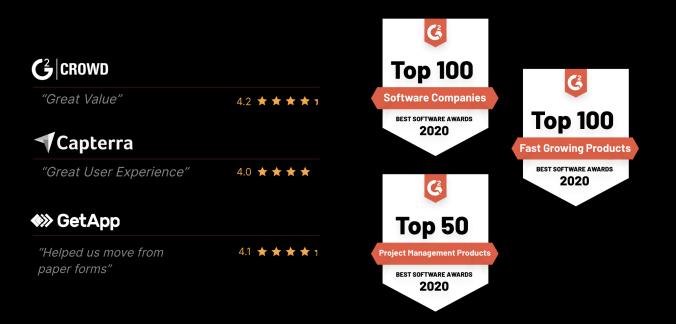

# 5 End users

- Elegant, modern layouts for applications
- Get feature requests built quickly

# **Kissflow customers**
