

#KillExcel

06 Reasons why Excel Just Doesn't Cut it

1. No Error Control

88% of spreadsheets contain significant errors

33% of businesses report poor decision making due to spreadsheet errors

2. Time Consuming

4-10 hrs of employees' time in a week is spent on repetitive tasks

50% of employees find combining spreadsheets a time-consuming chore

3. Data Inconsistency

84% of CEOs are worried about data quality they're basing decisions on

30% of the organization's revenue is affected due to poor data

4. Inefficient Collaboration

28% of employees are unable to deliver work on time due to poor communication

97% of workers believe that communication impacts their tasks every day

5. Lack of Security

38% of Excel data produce a group of malicious file extensions

588% of malicious attacks were caused by XXL files in 2021 end quarter

6. Minimal Visibility

54% of workers don't know how their work contributes to their company's growth

29% of workers feel burnt out due to a lack of clarity on tasks and roles

Other Hidden Pitfalls of Excel

Zero Audit Trail

Loss of Historical Data
